

Sustainability & Environmental Compliance Portfolio

Why Sustainability & Compliance Now?

Sustainability isn't optional. It's existential. The compliance landscape is shifting faster than industry cycles.

Global Regulation: The EU's Corporate Sustainability Reporting Directive (CSRD), Corporate Sustainability Due Diligence Directive (CSDDD), and the SEC's climate disclosure rules are no longer aspirational; they are enforceable.

Extractive industries across Africa and Caribbean and the Caribbean now sit under dual pressure:

International investors demand ESG transparency

Local regulators strengthen environmental oversight.

Capital Markets

Investors are increasingly funneling capital into assets that demonstrate clear carbon strategies and verifiable compliance.

Failure to adapt exposes companies to:

Regulatory penalties and operational shutdowns

Stranded assets in oil & gas and infrastructure sectors

Investor divestment and loss of market credibility

Our Compliance Philosophy

We operate on a core principle: that sustainability, compliance, and business strategy are fundamentally interconnected.

Compliant

We ensure full alignment with global, regional, and local legislation such as EU directives, Africa and Caribbean energy transition policies, UNFCCC protocols.

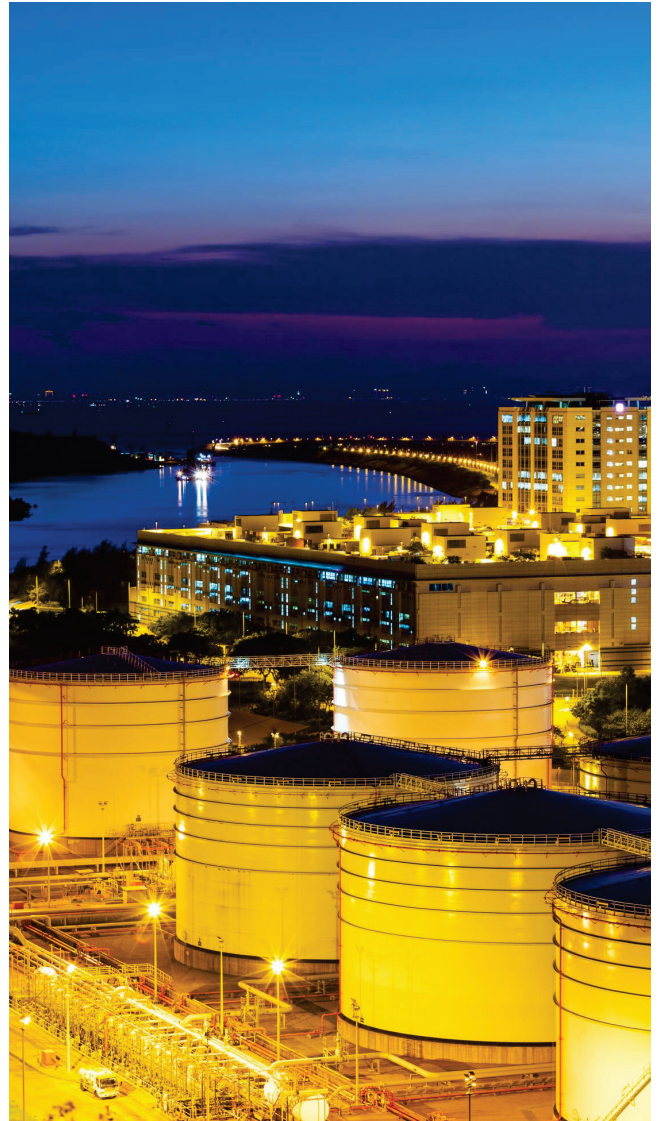

Credible

We build robust governance and auditable ESG data pipelines, ensuring disclosures hold up under investor and regulator scrutiny.

Climate-Aligned

Every compliance step is positioned against net-zero trajectories, enabling clients to contribute to, and benefit from the global low-carbon transition.

COMPLIANT. CREDIBLE. CLIMATE-ALIGNED

Our Philosophy

Compliance is not a “minimum threshold.” It is a competitive differentiator, shaping license-to-operate, investor confidence, and long-term resilience.

We build
robust
governance &
auditable ESG
data pipelines

Core Service Stack

Our offerings span the entire compliance ecosystem; from frameworks to implementation.

ISO Auditing & Implementation (Energy and Environment)

- ISO 14001 (Environmental Management)
- ISO 50001 (Energy Management Systems)
- ISO 27001 (Information Security; critical for digital oilfields & smart O&G operations)

ESG Frameworks & Disclosure (Regulatory Compliance and Sustainability)

- Alignment with CSRD, SASB, ISSB, GRI, and TCFD
- ESG data governance for extractive industries
- Disclosure readiness assessments for listed and private companies

Carbon Planning & GHG MRV (Carbon Reporting)

- Tiered emissions inventories: Scope 1 (direct), Scope 2 (purchased energy), Scope 3 (value chain)
- Product Carbon Footprinting (PCF) for oil and gas processes
- Measurement, Reporting & Verification (MRV) frameworks (GRI, ISSB, TCFD etc), Article 6-aligned offsetting strategies

Environmental & Social Compliance = S

- Environmental & Social Impact Assessments (ESIA)
- Resettlement Action Plans (RAP)
- Stakeholder engagement compliance and grievance mechanisms

Together, these services build enduring compliant systems

Flagship Offerings

We bring signature products that deliver clarity and confidence to clients and investors alike.

Green Conformance Package

A bundled solution for Africa and Caribbeann IOCs and service companies, aligning operations with EU/US climate rules while accommodating regional regulatory realities. Includes:

ISO certification roadmaps

ESG disclosure alignment

GHG inventories and climate risk scoring

We set our benchmark and classify companies according to our tested framework

Transition Readiness Index (TRI)

A diagnostic index for oil & gas assets, ranking facilities on their readiness for decarbonisation and compliance with global benchmarks. Benefits include:

Investor transparency:

TRI scores can be published in prospectuses and ESG reports

Operational insight:

asset managers gain a clear map of retrofits required for compliance

Policy engagement:

regulators and governments use TRI outputs for national transition planning

Impact Pathways

We measure our success not in reports filed, but in risks reduced and opportunities unlocked.

QUANTIFIABLE CARBON REDUCTIONS

Risk Reduction

- Lower regulatory exposure through proactive compliance mapping
- Avoidance of costly penalties and operational disruptions

Climate Impact

- Quantifiable carbon reductions through robust MRV systems
- Integration of low-carbon fuels and electrification strategies

Investor Confidence

- ESG disclosures aligned with ISSB/GRI attract green financing
- TRI and Green Conformance Package used as decision tools by capital allocators
- TRI scores can be published in prospectuses, white papers and ESG reports

Social License

- Compliance with ESIA and RAP requirements strengthens community trust
- Transparent stakeholder engagement ensures projects secure local legitimacy

THRIVE IN IT

Each compliance measure strengthens resilience, enabling companies not only to survive disruption, but to thrive in it.

The Strategic Partner Promise

We are more than consultants, we are partners in industrial transformation.

Africa and Caribbean-rooted, globally aligned. We understand the operational realities of Africa and Caribbeann markets, while embedding world-class compliance standards.

Investor-trusted. Our frameworks and indices are designed to withstand the scrutiny of lenders, investors, and regulators.

Future-focused. We anticipate compliance shifts before they crystallise, ensuring clients stay ahead of regulation rather than chasing it.

BUILDING CREDIBILITY, RESILIENCE, & VALUE

Engage us today because sustainability is no longer about surviving tomorrow.

It's about building credibility, resilience, and value for the future.

Compliant

To keep you compliant with the world's toughest regulators

Credible

To make you credible in the eyes of investors and stakeholders

Climate-Aligned

To ensure you are climate-aligned, ready for the low-carbon economy

OUR PROMISE
